

There, where the last evening sunbeams touch  
land, on the western part of Brda, where Slovenia  
borders with Italy, in a small village,  
called Neblo, is situated ours,  
Zanut homestead.

One hour and a half drive from Ljubljana,  
from Venice or from the Austrian border as well.  
From wherever you come, let the road guide you  
into the heart of Brda, where our vineyards lie,  
scattered around on sunny hills and valleys.  
Because all of our vineyards grow on marl, slate  
and sandstone ground and extremely sunny  
positions, all of our wines are distinctively  
mineral and warm, full of sun energy.

There, on roughly twenty-five thousand vines  
ripe delicious grapes, which reach or even  
overcome the full ripeness at harvest time.

All bunches are carefully selected in the  
vineyard, hand-picked into cases and very  
carefully brought to the wine cellar, where we  
produce over 500 hl of wine yearly,  
divided into 2 lines:

first: teasing, juvenile, fresh wines made of a  
selection of grapes from younger vineyards,  
second: from a selection of grapes from older  
vineyards on the best geographical positions,  
which in good vintages give life to particular,  
exceptional wines -
